

MAGNETIC VISE – EM110

Dimensions (mm)				
Part Number	Length	Width	Height	Weight kg
1002/20/110	170	110	70	7,3

Use : Clamping of irregular shaped or tapered workpieces.

Features :

- The force to secure the workpiece is produced by magnetic power only. Thus, unlike mechanical clamping, no undue force is applied. (Nonmagnetic workpiece cannot be held).
- The select handle can be operated from both sides.
- Can be installed on magnetic chuck on a machine.
- Magnetic force : side slip resistance is 575 N (57.5 Kg) for iron square bar of 30 x 30 x 130 mm and 480 N (48 Kg) for iron round bar of \varnothing 30 x 130 mm.
